SHORT COMMUNICATION

METRIOCNEMUS CAPICOLA, A REPLACEMENT NAME FOR METRIOCNEMUS CAPENSIS HARRISON 2002

AD Harrison

Freshwater Research Unit, Department of Zoology,
University of Cape Town, Rondebosch, Cape Town.

Harrison (2002) named a new species of *Metriocnemus*, '*M. capensis*', overlooking the fact that the name was preoccupied. Freeman & Cranston (1980) listed another species, *Parametriocnemus capensis* (Freeman), but Freeman (1954) originally named that species *Metriocnemus capensis*. Harrison's species name is therefore invalid and must be considered a homonym, *Metriocnemis capensis* Harrison

homonym. A replacement name, *Metriocnemus capicola nomen novum* is proposed for Harrison's (2002) species.
